SUBJECT INDEX

Alanine dipeptide
Ab initio force fields of alanine dipeptide in four non-hydrogen bonded conformations, 173
Algebraic structure count
Kekulé structures and algebraic or corrected structure count, 1
Amino-sulfur compounds
An ab initio study of amino–sulfur compounds, 335
Aminoethanol
Ab initio studies of molecules with N–C–O units. Part III. 1-Methoxy-*N*-methylmethylamine and 1-aminoethanol, 277
Antibiotics
The study of an interaction model of β-lactam antibiotics with their target enzyme, 17
Aza analogues
Theoretical studies of aza analogues of platonic hydrocarbons. Part 1. Cubane and its aza derivatives, 67

Benzenoid hydrocarbons
Pascal recurrence algorithm for Kekulé-structure counts of benzenoid and coronoid hydrocarbons, 135
Benzocyclobutenes
Mills–Nixon effect in benzocyclobutenes, 89
Branched polyenes
Analysis of the π-electronic structure of infinitely large networks. Part III. Branched polyenes with bond alternation, 153

C_2N_2 molecule
An ab initio study of the C_2N_2 molecule: NCCN, CNNC and CNCN species, 77
Charge-transfer complexes
Ab initio UHF-SCF calculations on LiF_2 and LiC_2 charge-transfer complexes, 205
Coronoid hydrocarbons
Pascal recurrence algorithm for Kekulé-structure counts of benzenoid and coronoid hydrocarbons, 135
Corrected structure count
Kekulé structures and algebraic or corrected structure count, 1
Cubane
Theoretical studies of aza analogues of platonic hydrocarbons. Part 1. Cubane and its aza derivatives, 67

Electric field effects
The effect of electric field on infinite quasi-one-dimensional polymers: approximate determination of hyperpolarizabilities, 39
Electronic structure
Analysis of the π-electronic structure of infinitely large networks. Part III. Branched polyenes with bond alternation, 153
Ethylhydrazine
An ab initio gradient study of ethylhydrazine, 49

Fluorotoluene
A theoretical study of molecular structure, internal rotation and non-bonded interaction in toluene and *p*-fluorotoluene, 287
Force fields
Ab initio force fields of alanine dipeptide in four non-hydrogen bonded conformations, 173

Global energy minimum
Does the global energy minimum also mean the thermodynamically most stable structure?, 143

Hydride transfer
Reactivity of biologically important reduced pyridines. Part III. Energetics and mechanism of hydride transfer between 1-methyl-1,4-dihydronicotinamide and the 1-methylnicotinamide cation, a theoretical study, 315
Hydroxypyridazines
Tautomerism of hydroxypyridazines. A semiempirical (AM1, MNDO, MINDO/3, CNDO/S-CI) and ab initio molecular orbital study, 295
Hyperpolarizabilities
The effect of electric field on infinite quasi-one-dimensional polymers: approximate determination of hyperpolarizabilities, 39

Interaction energies
The decomposition of the SCF and Heitler–London interaction energies for small and medium size basis sets, 211
Interaction model
The study of an interaction model of β-lactam antibiotics with their target enzyme, 17
Intramolecular hydrogen shifts
Ab initio study of 1,3- and 1,2-intramolecular hydrogen shifts of monothioformic acid, 109
Ionic conductivity
Ab initio calculations of potential barriers for ionic conductivity of the β-PbF_2 compound, 99

Kekulé structures
Kekulé structures and algebraic or corrected structure count, 1
Kekulé-structure counts
Pascal recurrence algorithm for Kekulé-structure counts of benzenoid and coronoid hydrocarbons, 135

Large networks
Analysis of the π-electronic structure of infinitely large networks. Part III. Branched polyenes with bond alternation, 153
LiC_2
Ab initio UHF-SCF calculations on LiF_2 and LiC_2 charge-transfer complexes, 205
LiF_2
Ab initio UHF-SCF calculations on LiF_2 and LiC_2 charge-transfer complexes, 205
Long-range coefficients
Long-range coefficients from molecular interactions. II, 235
Low-energy S–S and S–T transitions
MRD-CI study of the low-energy S–S and S–T transitions of thionitroso hydrogen (HNS), 11

Methoxy-*N*-methyl methylamine
Ab initio studies of molecules with N–C–O units. Part III. 1-Methoxy-*N*-methylmethylamine and 1-aminoethanol, 277
1-Methyl-1,4-dihydronicotinamide
Reactivity of biologically important reduced pyridines. Part III. Energetics and mechanism of hydride transfer between 1-methyl-1,4-dihydronicotinamide and the 1-methylnicotinamide cation, a theoretical study, 315
Methyluracil
Analysis of the vibrational spectrum of 6-methyluracil by ab initio calculation, 265
Mills–Nixon effect
Mills–Nixon effect in benzocyclobutenes, 89
Molecular gradient
An efficient procedure for calculating the molecular gradient, using SCF-CI semiempirical wavefunctions with a limited number of configurations, 123
Molecular interactions
Long-range coefficients from molecular interactions. III, 235
Monothioformic acid
Ab initio study of 1,3- and 1,2-intramolecular hydrogen shifts of monothioformic acid, 109
MRD-CI studies
MRD-CI study of the low-energy S–S and S–T transitions of thionitroso hydrogen (HNS), 11

N–C–O units
Ab initio studies of molecules with N–C–O units. Part 2. 1-Oxa-3-azacyclohexane, 1-oxa-3,5-diazacyclohexane and 1,3-dioxa-5-azacyclohexane, 29

N–N bond in N_2O_2
The origin of the long N–N bond in N_2O_2: an ab initio valence bond study, 253

Pascal recurrence algorithm
Pascal recurrence algorithm for Kekulé-structure counts of benzenoid and coronoid hydrocarbons, 135

PbF_2
Ab initio calculations of potential barriers for ionic conductivity of the β-PbF_2 compound, 99

Phenols
Acidities of *ortho* substituted phenols, 309

Platonic hydrocarbons
Theoretical studies of aza analogues of platonic hydrocarbons. Part 1. Cubane and its aza derivatives, 67

Potential barriers
Ab initio calculations of potential barriers for ionic conductivity of the β-PbF_2 compound, 99

Pyridines
Reactivity of biologically important reduced pyridines. Part III. Energetics and mechanism of hydride transfer between 1-methyl-1,4-dihydronicotinamide and the 1-methylnicotinamide cation, a theoretical study, 315

Quasi-one-dimensional polymers
The effect of electric field on infinite quasi-one-dimensional polymers: approximate determination of hyperpolarizabilities, 39

SCF-CI semiempirical wavefunctions
An efficient procedure for calculating the molecular gradient, using SCF-CI semiempirical wavefunctions with a limited number of configurations, 123

Thionitroso hydrogen
MRD-CI study of the low-energy S–S and S–T transitions of thionitroso hydrogen (HNS), 11

Toluene
A theoretical study of molecular structure, internal rotation and non-bonded interaction in toluene and *p*-fluorotoluene, 287

UHF-SCF calculations
Ab initio UHF-SCF calculations on LiF_2 and LiC_2 charge-transfer complexes, 205

Valence bond study
The origin of the long N–N bond in N_2O_2: an ab initio valence bond study, 253
